

# HYPERSPECTRAL IMAGING IN FOOD INDUSTRY

# COMPAN

World leading manufacturer and supplier for  
hyperspectral imaging technology and solutions.

- Business worldwide
- Headquarters in Oulu, Finland
- 25+ years of experience

# EXPERTI

Spectrographs and spectral cameras  
**SE**  
• Lab systems

- Field measurements
- Airborne measurements

# Remote Sensing

*Airborne hyperspectral imaging  
detects and classifies targets*

Geological  
exploration

**Environmenta  
l health**

Inspection of  
manmade  
infrastructure

**Precision  
Agriculture**

Law  
enforcement  
& military

# Detection & Identification

*Hyperspectral imaging  
sees much more than the human eye*

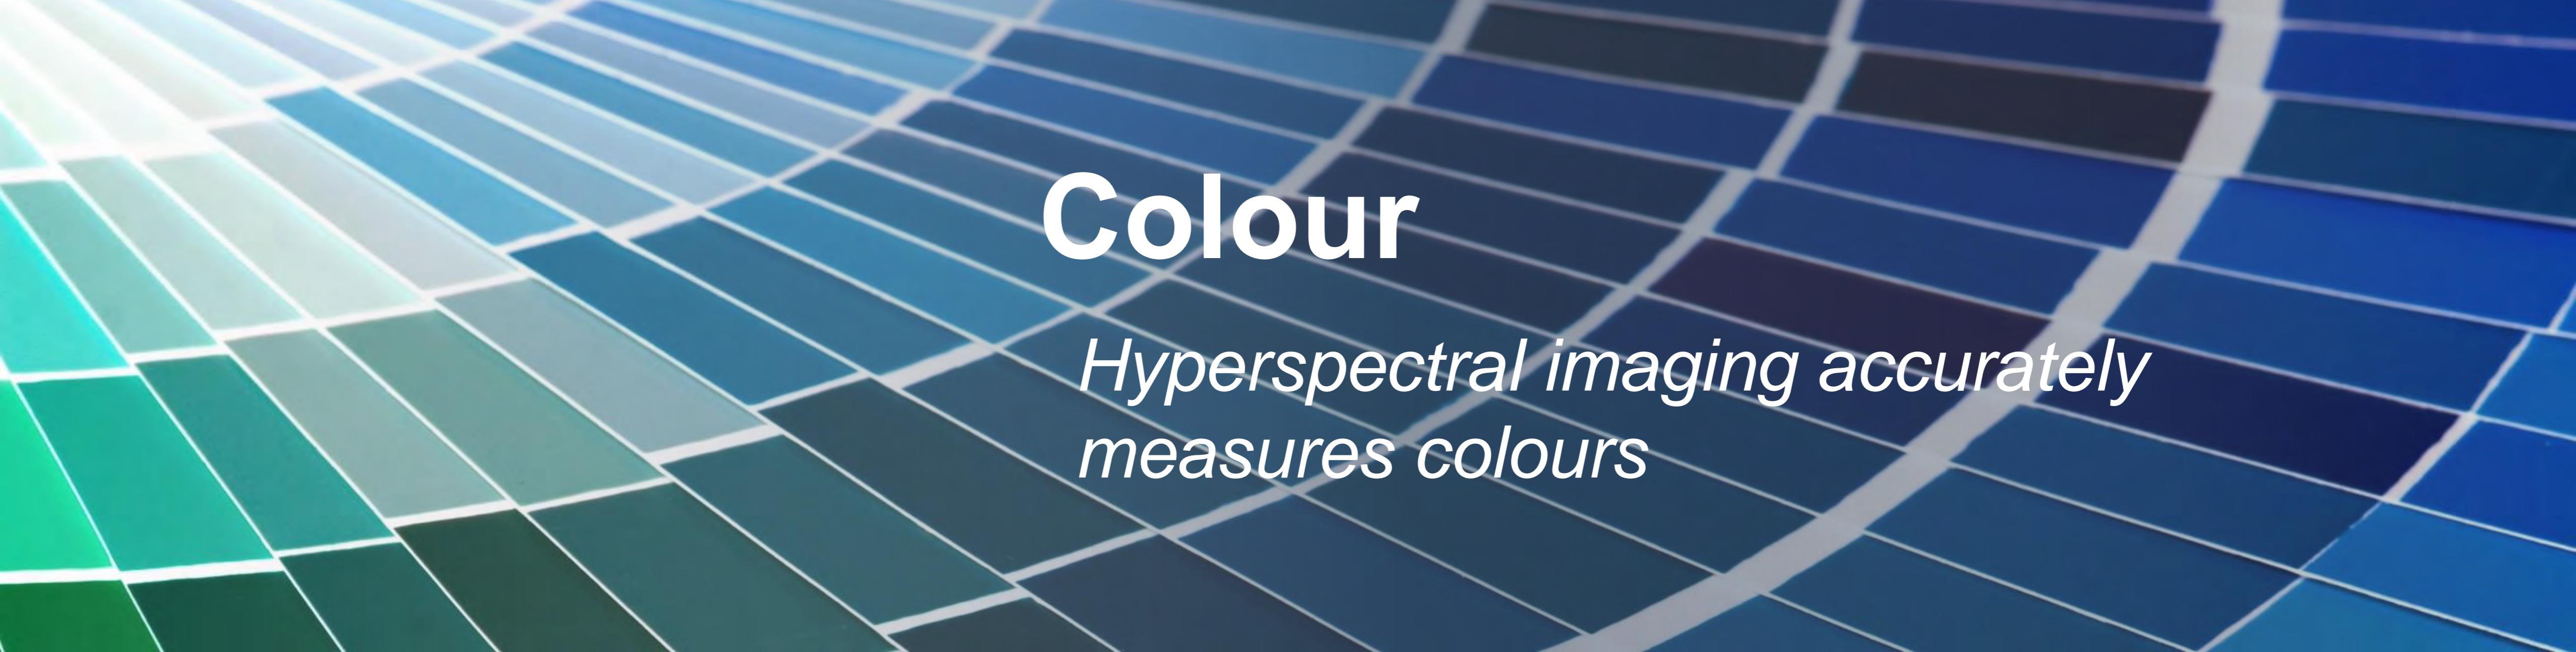

Plant  
disease and  
stress  
detection,  
phenotyping

Food, fruit,  
vegetable,  
grain, seed  
quality  
sorting

Forensics  
sample and  
crime scene  
inspection

Skin  
anomalies  
detection

Life sciences

# Colour

*Hyperspectral imaging accurately measures colours*

Printing  
process  
monitoring

Display  
quality &  
colour  
accuracy

**Colour  
conformity  
check of  
manufactured products**

Art analysis &  
restoration

# Chemical imaging

*Hyperspectral mapping of chemical compositions*

Waste material sorting & recycling

Bulk material monitoring, moisture content, foreign material detection

Composition of pharmaceutical products

Quality of food raw materials & products

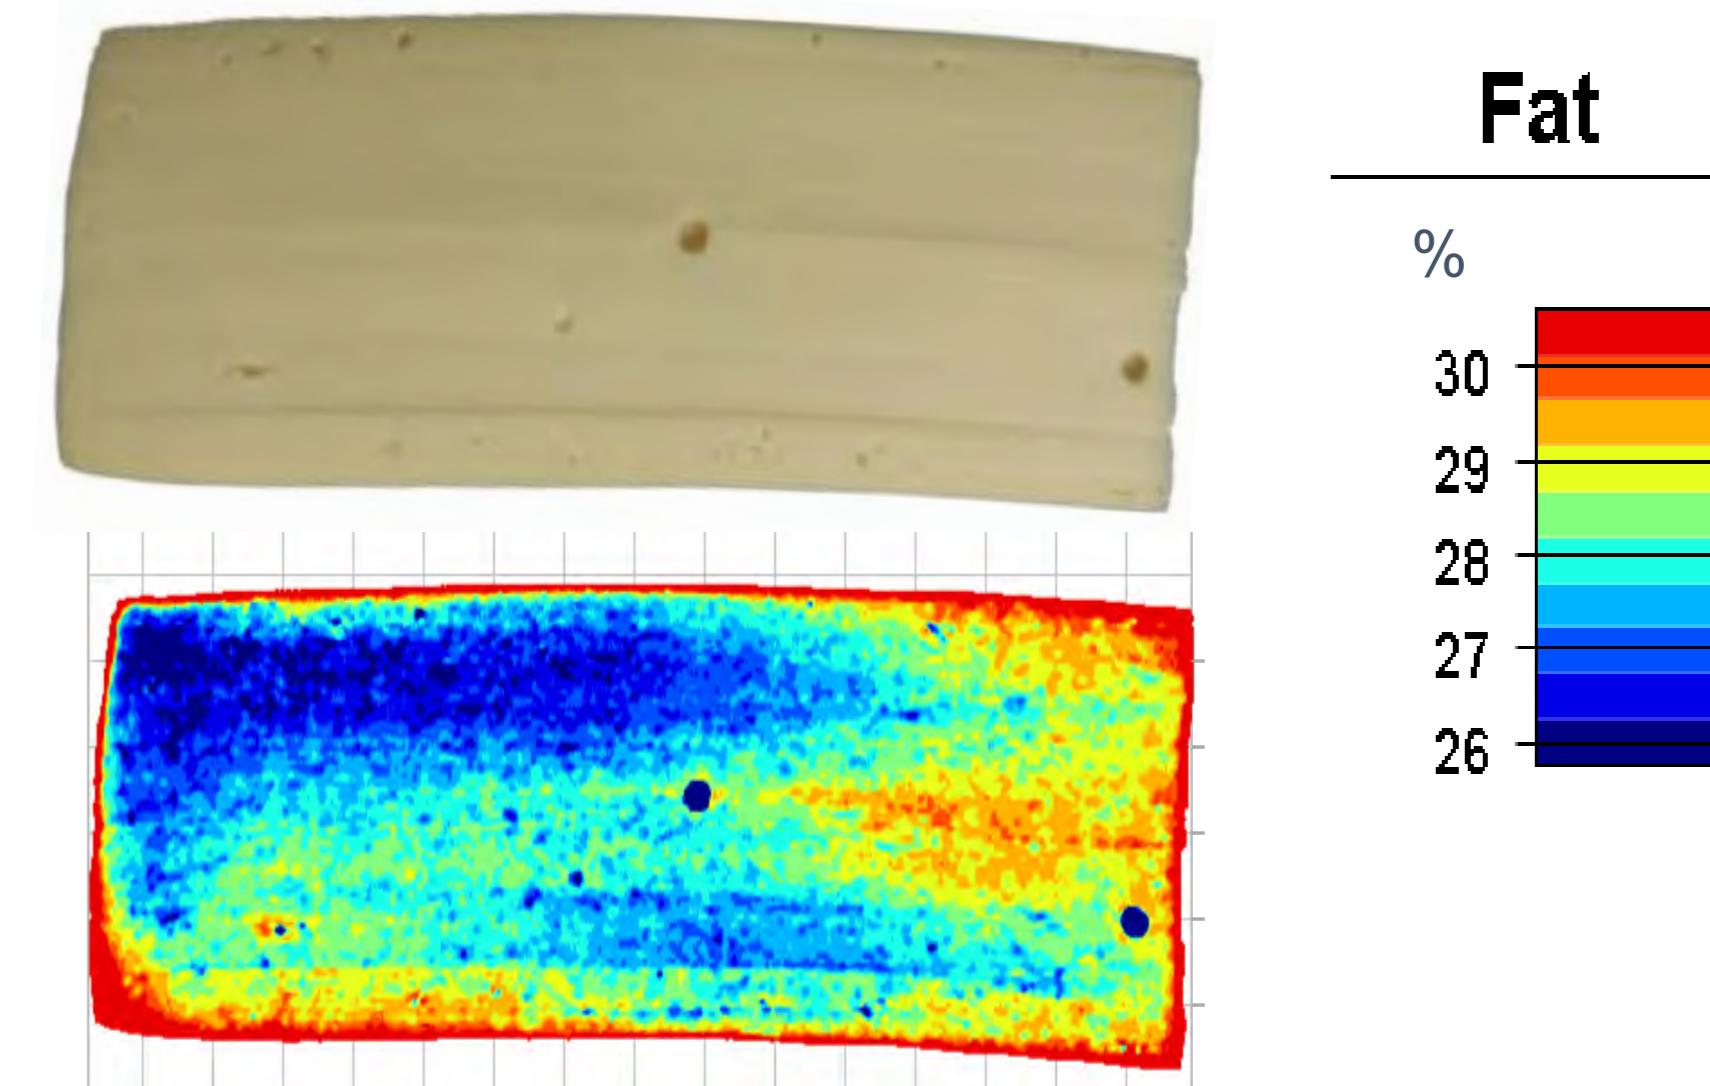

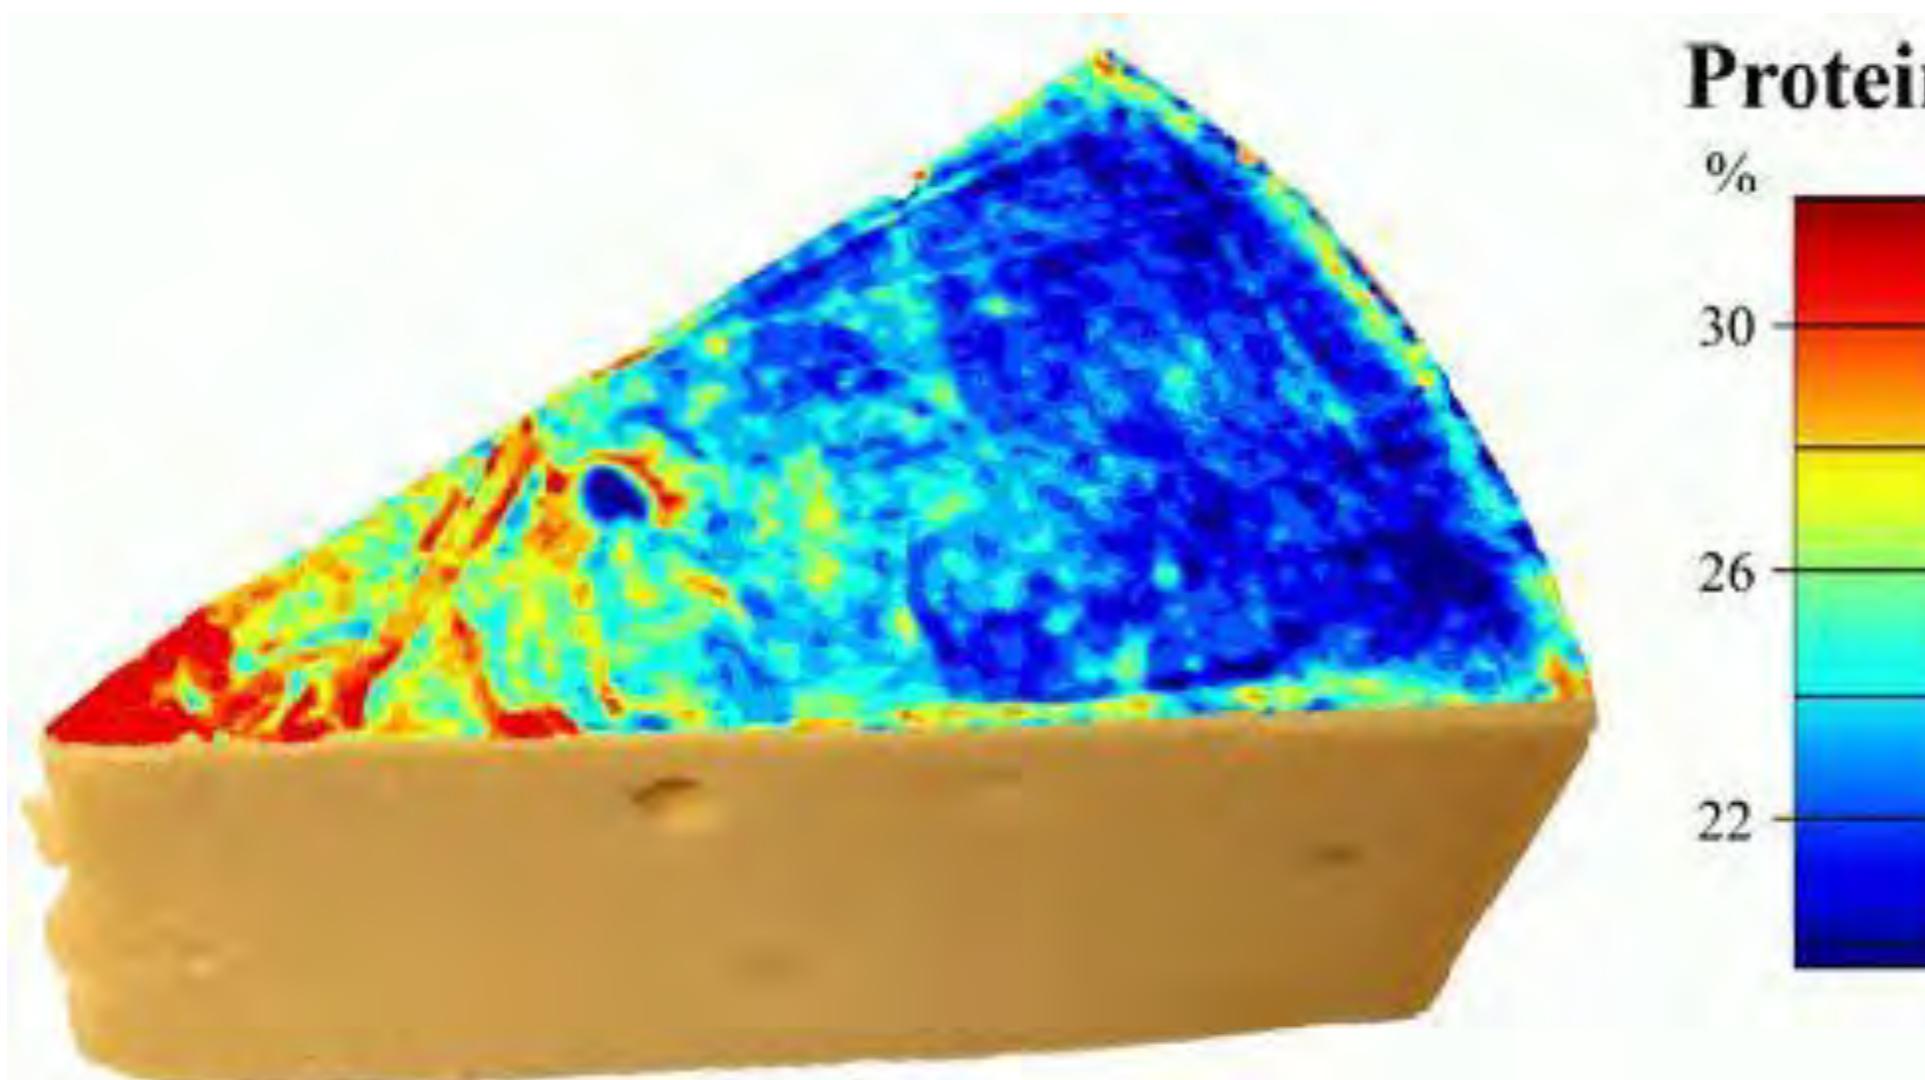

Mineral mapping of geological samples

Fake/Threat detection

# Drivers to food industry

- Combines chemical composition and image
- Non-contact, non-destructive optical method
- Safe, fast, reliable, on-line
- Real time results and sorting of rejected items
- Laboratory, on-line and portable solutions

# EXAMPLE: CHEESE

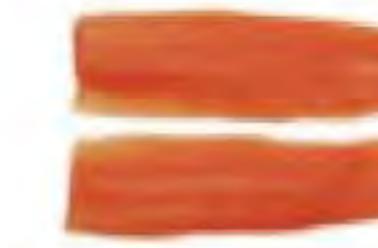

# Articles

Hyperspectral imaging applications for food and agricultural products.

Class	Product	Application	Image acquisition method	Wavelength (nm)	Reference
Fruits and Nuts	Apple	Bruise detection	Line-scan reflectance	900–1700	Lu (2003)
	Apple	Bitter pit detection	Line-scan reflectance	954–1350	Nicolai et al. (2006)
	Apple	Firmness evaluation	Area-scan scattering	650–1000	Peng and Lu (2006)
	Apple	Defect and feces detection	Line-scan reflectance/fluorescence	400–1000	Kim et al. (2007)
	Banana	Quality and maturity evaluation	Line-scan reflectance	400–1000	Rajkumar et al. (2012)
	Cantaloupe	Feces detection	Line-scan fluorescence	425–774	Vargas et al. (2005)
	Cherry	Pit detection	Line-scan transmittance	450–1000	Qin and Lu (2005)
	Citrus	Rottenness detection	Area-scan reflectance	460–1020	Gómez-Sanchis et al. (2008)
	Citrus	Canker detection	Line-scan reflectance	450–930	Qin et al. (2009)
	Grape	Quality evaluation	Line-scan reflectance	400–1000	Baiano et al. (2012)
	Peach	Firmness evaluation	Line-scan scattering	500–1000	Lu and Peng (2006)
	Strawberry	Quality evaluation	Line-scan reflectance	400–1000	ElMasry et al. (2007)
	Walnut	Shell and meat differentiation	Line-scan fluorescence	425–775	Zhu et al. (2007)
Vegetables	Cucumber	Chilling injury detection	Line-scan reflectance	447–951	Liu et al. (2005)
	Cucumber	Quality evaluation	Line-scan reflectance/transmittance	400–1000	Ariana and Lu (2008)
	Mushroom	Bruise detection	Line-scan reflectance	400–1000	Gowen et al. (2008)
	Onion	Sour skin disease detection	Area-scan reflectance	950–1650	Wang et al. (2012)
	Potato	Cooking time prediction	Line-scan reflectance	400–1000	Nguyen Do Trong et al. (2011)
	Tomato	Ripeness evaluation	Line-scan reflectance	396–736	Polder et al. (2002)
Meat	Beef	Tenderness evaluation	Line-scan reflectance	400–1000	Naganathan et al. (2008)
	Beef	Microbial spoilage detection	Line-scan scattering	400–1100	Peng et al. (2011)
	Chicken	Skin tumor detection	Line-scan reflectance	420–850	Chao et al. (2002)
	Chicken	Feces and ingesta detection	Line-scan reflectance	400–900	Park et al. (2002)
	Chicken	Bone fragment detection	Line-scan reflectance/transmittance	364–1024	Yoon et al. (2008)
	Fish	Moisture and fat evaluation	Line-scan reflectance	460–1040	ElMasry and Wold (2008)
	Fish	Ridge detection	Line-scan reflectance	400–1000	Sivertsen et al. (2009)
	Lamb	Lamb type discrimination	Line-scan reflectance	900–1700	Kamruzzaman et al. (2011)
	Pork	Quality evaluation	Line-scan reflectance	430–1000	Qiao et al. (2007)
Grains	Corn kernel	Constituent evaluation	Area-scan transmittance	750–1090	Cogdill et al. (2004)
	Corn kernel	Oil and oleic acid evaluation	Area-scan reflectance	950–1700	Weinstock et al. (2006)
	Corn kernel	Aflatoxin detection	Line-scan fluorescence	400–600	Yao et al. (2010)
	Wheat kernel	Fungus detection	Area-scan reflectance	1000–1600	Zhang et al. (2007)
	Wheat kernel	Sprout damage detection	Line-scan reflectance	1000–2500	Xing et al. (2009)
	Wheat kernel	Fusarium damage detection	Line-scan reflectance	400–1700	Delwiche et al. (2011)
Beverages	Milk	Fat content evaluation	Line-scan scattering	530–900	Qin and Lu (2007)
	Milk	Melamine detection	Point-scan Raman	102–2538 cm <sup>-1</sup>	Qin et al. (2010)
	Tea	Quality classification	Line-scan reflectance	408–1117	Zhao et al. (2009)
